

**TABLE OF TWO-DIGIT RANDOM NUMBERS**

**APPENDIX B (Cont.)**

## WHAT THEY SAY

☞ Statistics are no substitute for judgement.

**Henry Clay**

☞ I abhor averages, I like the individual case. A man may have six meals one day and none the next, making an average of three meals per day, but that is not a good way to live.

**Louis D. Brandies**

☞ The weather man is never wrong. Suppose he says that there's an 80% chance of rain. If it rains, the 80% chance came up, if it doesn't, the 20% chance come up.

**Saul Barron**

☞ The death of one man is a tragedy. The death of millions is a statistic.

**Joseph Stalin**

☞ When she told me I was average, she was just being mean.

**Mike Beckman**

☞ Why is a physician held in much higher esteem than a statistician? A physician makes an analysis of a complex illness whereas a statistician makes you ill with a complex analysis!

**Gary C. Ramseyer**
